Investment Philosophy

HDFC Flexi Cap Fund follows a research-driven, growth-at-a-reasonable-price approach. It invests in strong companies across large, mid and small caps that can survive downturns and emerge stronger. The portfolio is diversified across sectors and held for the long term, keeping turnover low (equity turnover 9.21%).

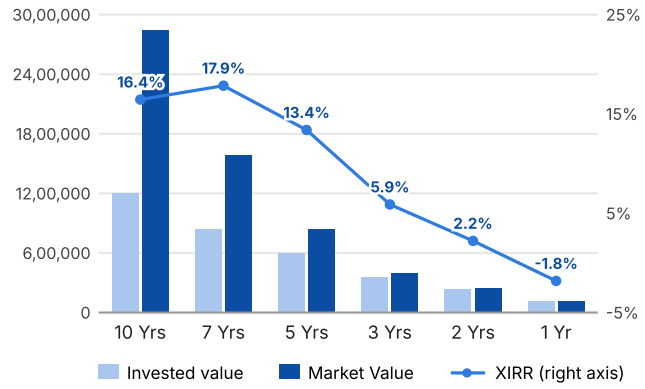

The fund's freedom to shift between market caps, together with its focus on valuations, makes it suitable for long-term investors seeking wealth creation above the broad market with lower volatility than its peers.
